ANOTHER WHITE ELEPHANT

Gov't paying \$2.2M for unused incinerator

MANILA (Philippine Daily Inquirer) — The government is paying \$2.2 million for a 100-ton-per-day incinerator that has been unused since it was built in 1997. The facility, located in the northern part of Manila, was built by a private company under a build-operate-transfer (BOT) agreement with the government. However, the company failed to secure the necessary permits to operate the incinerator, and it has been sitting idle ever since. The government is now looking for a way to dispose of the facility, which has become a white elephant.

The incinerator was built at a cost of \$10 million. It was supposed to be used to dispose of the city's solid waste, but it has never been used. The government is now paying \$2.2 million for the facility, which is now being used as a storage area for construction materials. The government is looking for a way to dispose of the facility, which has become a white elephant.

## Bribery in judiciary long a coffee-shop talk

LESTER

THE PHILIPPINE JUDICIARY has long been a topic of conversation in coffee shops and bars. The judiciary is a complex system, and the way it operates is often the subject of speculation and rumor. ## Army tags landslide area 'no man's land'

MANILA, Jan. 15 (AP) — A massive landslide in a mountainous area near the town of Marikina, south of Manila, has left a large area of land inaccessible to the public. The area, which is now a "no man's land," is being used by the military as a training ground. The landslide occurred on Jan. 12, 1991, and has caused the death of at least 10 people and the destruction of several buildings. The area is now a "no man's land" because of the danger of further landslides.

## GSIS pensioners get letters they're dead, according to records

MANILA, Jan. 15 (AP) — A man who has been told he is dead by the Government Service Insurance System (GSIS) is now looking for a way to prove he is still alive. The man, who is 65 years old, has been told by the GSIS that he has died and that his pension has been stopped. He has been looking for a way to prove he is still alive, but has been unable to do so. The GSIS has been told that the man is still alive, but has not been able to provide any proof.

# RP losing P140B a year due to smuggling

By John C. Nolasco

MANILA, Sept. 14 (AP) — The Philippines is losing about P140 billion a year due to smuggling, according to a report by the Asian Development Bank (ADB) released Tuesday.

The ADB report, titled "The Philippines: A Country Economic Update," says that the country's smuggling losses are equivalent to about 1.5 percent of its gross domestic product (GDP).

The report also says that the Philippines' smuggling losses are higher than those of its neighbors, Indonesia and Thailand.

MANILA, Philippines — The Department of Environment and Natural Resources (DENR) has filed charges against the head of the Inter-Agency Task Force (IATF) for the cleanup of the Agaña River, alleging negligence and lack of expertise in handling the river's pollution.

For the past decades, DENR has been working hard for the cleanup of the Agaña River.

LAST YEAR ALONE OVER A MILLION  
LITERS OF OIL HAVE BEEN  
CLEANED FROM THE RIVER.

The DENR has been working hard for the cleanup of the Agaña River.

No wonder we can say with pride that  
for the last 50 years, DENR has been working diligently.

THESE RESULTS ARE IN ACCORDANCE WITH THE  
FINDINGS OF OTHER STUDIES. THE STUDY  
WAS CONDUCTED IN A RURAL AREA OF  
INDIA. THE SAMPLE SIZE WAS 100.  
THE RESULTS WERE AS FOLLOWS:

1. The first step is to identify the key components of the system. This includes the hardware, software, and data.

# 6 out of 10 offroaders 'come down from the mountains,' for now

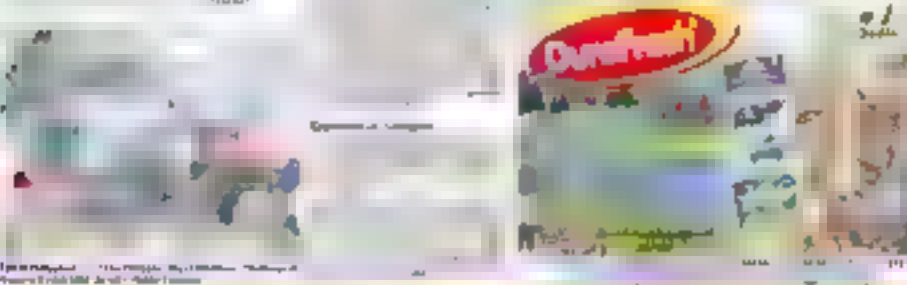

By [Name] [Date]

MANILA — The offroaders are coming down from the mountains. According to a new survey by the Philippine Offroad Vehicle Owners' Association (POVOA), 6 out of 10 offroaders now use their vehicles for daily commuting and errands, rather than just for weekend trips or off-road adventures.

The survey, which involved 1,000 offroaders from various regions, found that 60% of respondents use their vehicles for daily commuting and errands, while 40% use them for weekend trips or off-road adventures. This is a significant shift from previous years, when offroaders were primarily used for weekend trips and off-road adventures.

The reason for this shift, according to the survey, is the increasing popularity of offroaders as a means of daily transportation. Offroaders are now being used for a wide range of purposes, from commuting to work to running errands and visiting family and friends.

The survey also found that offroaders are becoming more popular among younger people, who are more likely to use them for daily commuting and errands. This is likely due to the fact that offroaders are now being marketed as a more practical and affordable means of transportation.

# Future is bright for this Mitsubishi electric car

Text and photos by  
Charles K. White

**I**MITATION IS THE SOUTHERN FORM OF FLATTERY. But when it comes to the Mitsubishi i-MiEV, the car of the future is here. The i-MiEV is a small, two-seater electric car that can travel up to 100 miles on a single charge. It's also one of the most affordable electric cars on the market, starting at just \$12,990. The i-MiEV is a perfect example of how far electric cars have come in recent years. It's a car that's easy to drive, easy to park, and easy on the wallet. And it's a car that's ready for the future.

**Way to a green future**—Mitsubishi's i-MiEV. Four seats require no extra seat belt.

**EV styling**  
The i-MiEV's compact design makes it easy to maneuver in tight spaces. The car's small size also makes it a great choice for city driving.

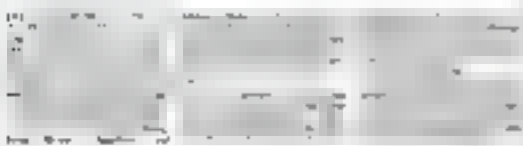

**EV charging**  
The i-MiEV can be charged at home or at a public charging station. The car's charging port is located on the rear side. The charging process is simple and takes about 8 hours for a full charge. The i-MiEV is also equipped with a backup battery that can power the car for up to 10 minutes in case of an emergency.

## 10 ways to improve your vehicle's performance

1. Upgrade your tires. New tires can improve your car's handling and fuel economy.
2. Change your oil. Regular oil changes keep your engine running smoothly.
3. Clean your air filter. A clean air filter allows more air to enter your engine, improving performance.
4. Check your spark plugs. Worn spark plugs can cause your car to run poorly.
5. Upgrade your battery. A new battery can start your car more easily and last longer.
6. Check your brakes. Worn brakes can be dangerous and affect your car's performance.
7. Upgrade your suspension. A better suspension can improve your car's ride and handling.
8. Check your alignment. Proper alignment keeps your car running straight and true.
9. Upgrade your headlights. Better headlights can improve your visibility at night.
10. Upgrade your stereo. A better stereo can make your drive more enjoyable.

## Good home finds

### in Bangkok thrift shops

plus, you'll find a lot of other things you can't find elsewhere

By John Brown

**R**emember the old adage: "If you don't use it, you lose it." Well, that's not always true. In Bangkok, there are many places where you can find things you've lost or things you never knew you had.

One of the best places to find these things is in the many thrift shops that are scattered throughout the city. These shops are a treasure trove of old and new items, from books and records to furniture and clothing.

One of the most popular thrift shops in Bangkok is the one located in the old market area. This shop has been around for many years and has a large selection of items for sale. It's a great place to find everything from old books and records to furniture and clothing.

Another great place to find things is in the many smaller thrift shops that are located in the city. These shops are often run by individuals and have a more limited selection of items, but they can still be a great place to find some unique finds.

So, if you're looking for some good home finds, head on over to one of the many thrift shops in Bangkok. You'll be sure to find something that you can't find anywhere else.

## Japanese and Filipino touches turn this high-rise into a home

What if your culture can't age, and it.

By [Name] [Location]

**C**onceptualizing a high-rise apartment building that would be a home for the Filipino and Japanese communities in the Philippines was a challenge for the developers of the new high-rise apartment building in the Philippines.

The building, which is located in the heart of the city, is a high-rise apartment building that is designed to be a home for the Filipino and Japanese communities in the Philippines.

**Two-ways are real**

Two-way traffic is a reality on many of the nation's highways. The Federal Highway Administration (FHWA) has been studying the issue for years, and its latest report, "Two-Way Traffic on Two-Lane Highways," provides a comprehensive overview of the problem. The report, which is available for free download from the FHWA website, discusses the challenges of two-way traffic on two-lane highways, including the risk of head-on collisions and the impact on travel time. It also provides a list of strategies for improving two-way traffic flow, such as the use of passing lanes and variable message signs.
